GitHub: github.com/chrstnjsff | Mandaluyong, Philippines

SUMMARY

- Senior DevOps Engineer with 7+ years across AWS, Azure, GCP, Kubernetes, and Infrastructure as Code (Terraform, OpenTofu). Operates 148 Kubernetes clusters at 99.95%+ production uptime.

SKILLS

- **Cloud Platforms:** AWS, Google Cloud Platform (GCP), Microsoft Azure, multi-account design
- **Infrastructure as Code (IaC):** Terraform, OpenTofu, Pulumi, Atlantis, Ansible
- **Containers and Orchestration:** Kubernetes (EKS, GKE, AKS), Amazon ECS, Docker, Helm, AWS Karpenter, cluster upgrades, autoscaling
- **CI/CD and GitOps:** GitLab CI/CD, GitHub Actions (OIDC to AWS), Jenkins, ArgoCD, SonarQube, Amazon ECR
- **Observability and Operations:** Prometheus, Grafana, Loki, Mimir, OpenTelemetry, Datadog migration, Elasticsearch, P1/P2 incident response, root cause analysis, SLA/SLO management, ServiceNow
- **Security and Governance:** AWS Organizations, IAM Identity Center, SCPs, CloudTrail, Config, GuardDuty, Security Hub, KMS, FinOps
- **Languages:** Python (Django), JavaScript (React 18, Node.js), Bash, PowerShell, Linux
- **Agentic Engineering:** Claude Code, Model Context Protocol (MCP), AI-assisted development
- **Leadership:** Technical leadership, stakeholder communication, mentoring, code reviews, runbooks

EXPERIENCE

Nova Virtual Solutions (Freelance client) **Indiana, USA (remote)**
Senior DevOps Engineer *Apr 2026 - Nov 2026*

- Hired as a B2B independent contractor to build a multi-tenant portal for a US home care agency, with a React 18 frontend and a Python Django backend API: caregiver and client onboarding, e-signed admission documents, custom forms, and electronic visit verification (EVV).
- Deployed the portal on AWS ECS through GitLab CI with a pip-audit security gate, frozen-lockfile builds, and Sentry error tracking; staging scales down outside working hours to cut cost.
- Built a HIPAA-aligned, multi-account AWS landing zone with OpenTofu: Identity Center SSO, SCPs, CloudTrail, GuardDuty, Security Hub, OIDC CI roles, and nightly drift detection.
- Built a consent-based live screen sharing and productivity monitoring platform (React, Node.js, LiveKit, PostgreSQL) with Cognito and Entra SSO and Playwright tests.
- Built a FinOps dashboard: a daily Lambda collector reads Cost Explorer, Config, and Budgets across AWS accounts into a CloudFront site, with Claude on Amazon Bedrock filling invoice fields.

Iron Mountain Philippines **Taguig City, Metro Manila PH (remote)**
Senior DevOps Engineer *Oct 2025 - Present*

- Lead incident triage, change planning, and stakeholder communication as primary Point of Contact for the mission-critical ICM application and infrastructure.
- Maintain 99.95% uptime for the ICM, Insight, and DXP platforms through secure releases and production stability work.
- Build AWS, Azure, and GCP infrastructure with OpenTofu, delivering auditable environments with 35% faster provisioning.
- Operate 148 Kubernetes clusters on EKS, GKE, and AKS, including per-environment Kubernetes and OpenTofu upgrades.
- Traced an EKS SSO outage after an Nginx-to-ALB migration to a Terraform condition removing external-dns, fixed the module and DNS, and added alerts and runbooks.
- Improve GitLab CI/CD pipelines and versioned DXP tenant releases with Akeyless secrets, partnering with engineering and security teams to cut MTTR by 40%.
- Manage Prometheus, Grafana, Loki, Mimir, and OpenTelemetry alerting for P1/P2 response, plus 44 Elasticsearch and 73 MongoDB clusters, Kafka, Redis, and PostgreSQL.
- Built the team's ServiceNow dashboard for the attention queue and change requests.

One Team Anywhere (MRGE) **Lahug, Cebu City PH (remote)**

Cloud and DevOps Engineer *May 2024 - Oct 2025*

- Led AWS and GCP infrastructure with Terraform, Pulumi, and OpenTofu, delivering 40% faster deployments and 99.99% platform availability.
- Administered 50 EKS and GKE clusters with autoscaling and ArgoCD GitOps deployments, improving workload reliability by 30%.
- Migrated a client's on-premise, MySQL-backed applications to EKS and Amazon RDS with Terraform and ArgoCD, then trained its developers on AWS and Kubernetes.
- Moved observability from Datadog to Prometheus and Grafana Cloud with Terraform, Atlantis, and Slack alerting to cut cost, holding a 99.9% SLA.
- Moved DNS for the client and five acquired companies (Shopping24, MaxBounty, Digidip, YK, SourceKnowledge) from Cloudflare to AWS Route 53 with Terraform.
- Built the Tech Radar release path: GitHub Actions authenticates to AWS with OIDC, pushes images to Amazon ECR, and ArgoCD deploys them through GitOps.

Stratpoint Global Outsourcing **Mandaluyong City, Metro Manila PH (remote)**

Cloud Engineer III *Mar 2022 - May 2024*

- Led 4 engineers as Technical Lead across frontend, backend, and infrastructure for a telco application serving 3.6M+ users.
- Built reusable Terraform modules for 10+ AWS services (EKS, RDS, S3, IAM), standardising development, staging, and production deployments.
- Co-designed Atlas, an internal developer platform of golden paths on AWS Service Catalog and automated CI/CD, giving 500+ engineers self-service AWS provisioning.
- Owned environment configuration, IAM access control, and deployment pipelines for client projects; reviewed code and mentored engineers on Infrastructure as Code.

DXC Technology **Taguig City, Metro Manila PH (remote)**

Service Information Developer III *Oct 2020 - Mar 2022*

- Operated AWS infrastructure as Single Point of Contact for 3 luxury retail clients (1,000+ stores) at a 99.5% SLA; built Terraform provisioning modules and wrote technical runbooks.
- Handled ITIL-based incident management in HP Service Manager and supported Oracle databases within SLA targets.
- Resolved point-of-sale (POS) issues, including Oracle errors, hardware faults, and tax failures.
- Monitored sales data transmission to SAP and Data Warehouse platforms.

Bosch Service Solutions **Taguig City, Metro Manila PH (remote)**

Service Desk Engineer *Dec 2018 - Oct 2020*

- Automated software installs with PowerShell, reducing install time from 30 minutes to 2, and streamlined BMC Remedy ticketing across about 60 daily tickets, reducing escalations by 15%.
- Administered user accounts through CI-CAT and SAP roles through OneIDM.
- Wrote Active Directory and Microsoft 365 troubleshooting runbooks for the service desk team.

EDUCATION

Jose Rizal University **Mandaluyong City**

Bachelor of Science (BS) in Information Technology *Graduated Oct 2017*

CERTIFICATIONS

- HashiCorp Certified: Terraform Associate (Sep 2025 - Sep 2027)
- ITIL 4 Foundation (Skillsoft, Nov 2021)
